

Technical Expertise Centre

BESTECH's Technical Expertise Centre (TEC) is our team of principal engineers and subject-matter experts who are at the top of their field.

The multidisciplinary group includes electrical, mechanical, structural, automation, and computer engineers along with designers, business analysts, ventilation and energy specialists, and software developers. They excel in working with clients and teams on the most complex and challenging projects.

As a unique department to BESTECH, this group ensures outstanding results through innovative engineering design, supply solutions, and field services. TEC provides oversight by guiding projects and new initiatives to ensure designs, plans, schedules, and implementations are completed to the highest quality.

TEC is dedicated to the success of clients and their projects. As a multidisciplinary group, their shared knowledge offers unique and innovative solutions to clients' complex problems.

As leaders in their field, the TEC group provides valuable guidance and mentorship to BESTECH's entire team. Their years of knowledge and expertise are passed along to junior staff to aid in their professional growth and the development of the company.
